PROGRAMMER

We develop various kinds of applications platform independent such as smart-devices applications and websites applications considering customer needs and requirements.

Using popular programming languages and the latest technologies such as : PHP , ASP.NET , Visual Basic.NET , Java , JQuery , CSS3 ... etc

</CODE>

First : Prototype Design

We provide similar designs to his/her conceptual model , demands and ideas as we dicuss it together and agree on scope of work and delivery time then we will provide a prototype model.

Second : Updates

After we agreed on scope of work and time needed to complete the website we provide three free of charge updates on any website pages either on prototype design or directly on website.

Third : Final Design

We provide the final design to our customer and with that Safnah.com isn't responsible on any updates afterwards and guarantee final design for three designs without any additional updates after delivery completion.

Website is the main door to our achievements ,works and products therefore it needs special simple design to share our vision and information with our website visitors.

We provide a vast various design options and customized design service.

* Design price depends on content which vary between (\$15 - \$50) / page & language

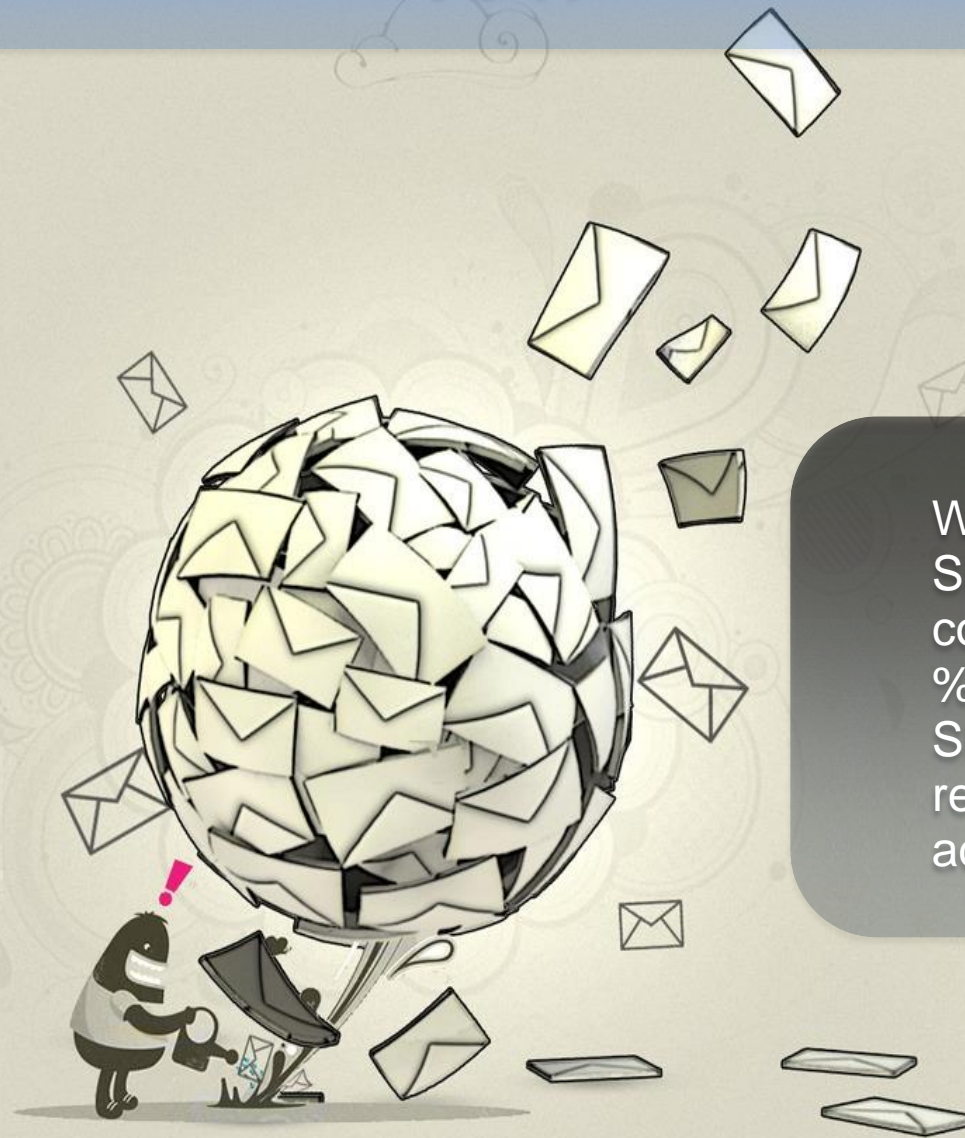

* Re-Design full page price is \$20 / page & language with opened time framework at most 5 working days (prices subject to change depending on delivery time rescheduling)

* Default updates are three and counted on single page then calculated depending on type and time needed to accomplish the update.

Page ranking & Search Engine Optimization (SEO) ... page (4)

Most of websites shuts down because they fail in getting visitors specially the new ones , one of the reasons is they aren't search engines friendly (optimized).

We guarantee visitors from over the world to your website and getting it on top in search engines by our corporation with Google , Yahoo and Microsoft ... etc

We provide international SMS bulk service to most countries over the world , 80 % of mobile users read their SMS inbox therefore we recommend it for advertisement purposes

**Without marketing, advertisements and campaigns ... etc
we can't achieve global success , therefore we provide various
solutions such as (Stamps , business cards , posters , brochures
... etc)**
